SALES

The World's Largest Independent Anesthetic Vaporizer Service and Calibration Provider

General Anesthetic Services management and staff bring over 40 years of experience in the service and supply of anesthetic vaporizers. Knowledge established through the design, manufacture, production, and servicing of anesthetic vaporizers.

General Anesthetic Services Vaporizer Service/Exchange program has become an accepted industry standard throughout North America and Worldwide. The success of this program is attributed to large pharmaceutical companies, anesthesia technicians, and biomedical staff sharing information between their professional groups.

General Anesthetic Services delivers quality, timely vaporizer service unrivaled in the industry.

Core Values

KNOWLEDGE

Unparalleled industry experience standing over 40 years.

QUALITY

Upholding the highest quality standards with ISO 13485 certification specific to medical device.

PATIENT & OPERATIVE SAFETY

Vaporizer service maintains device accuracy and best practices.

Reducing Carbon Footprint, One Vaporizer at a Time

At General Anesthetic Services, Inc., we champion sustainability by mitigating carbon footprint and curbing the influx of heavy metals into landfills. Our pledge lies in refurbishing, servicing, and maintaining anesthetic equipment, sparing the environment from unnecessary strain caused by the introduction of new vaporizers. Through innovative service and exchange programs, we actively diminish the demands for fresh medical equipment, fostering a healthier planet for generations to come.
